14. Add multiple reception desks
15. Add multiple users with respect to its rights management

DOCTOR PRESCRIPTION

e-Dcotor is a flexible, and comprehensive medical practice solution suitable for both the clinical and the hospital environments. It allows practitioners to keep both Electronic Health Records and Electronic Medical Records, thus providing them with flexible and updated access to online reference regarding patients, prescriptions, test results, lab results, progress reports, allergies, etc.

This medical practice solution aims at covering the entire process - from patient history to previous condition reports, from allergy checks to lab results, from medical certificates to dental records, and from medicine databases to comprehensive prescription management.
